# EUROPEAN EQUINE COELIOSCOPY WORKSHOP

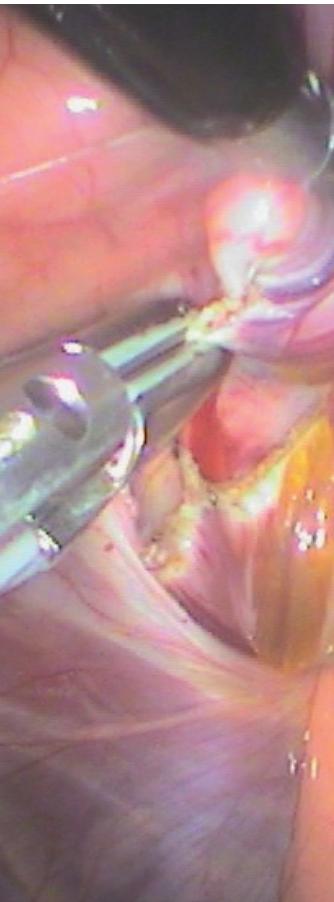

**EnVA**

École nationale vétérinaire d'Alfort

BASIC IN VIVO COURSE

We are pleased to invite you to the first edition of the European Equine Coelioscopy Workshop ! The National Veterinary School of Alfort and the Grosbois Equine Clinic are willing to provide a highly practical workshop, with hands on in-vivo labs and presentation of clinical cases and surgical pitfalls.

## ADVANTAGES

- ✓ The opportunity of in vivo labs - accredited through the ANSES/ENVA/UPEC ethic committee following ministerial authorization ;
- ✓ Benefit from the tips of experienced surgeons ;
- ✓ The National Veterinary School of Alfort, which is one of the oldest in the world, is located in the near suburbs of Paris, and easily accessible via public transportation.
- ✓ State of the art lectures given in this unique atmosphere will focus on general principles in coelioscopy, surgical techniques and tips, as well as common surgical procedures in equine practice.
- ✓ Our goal is to go from « how to » to « can do ». This course is principally dedicated to ECVS residents and diplomates, with some acceptance for surgeons with experience in surgery.
- ✓ Our long standing partners OPTOMED and COVIDIEN will provide you with state of the art equipment.

## PARTNERS

## PROGRAM *(Drinks and snacks will be provided)*

### Friday

#### • 10.00 - 12.00 : theory

Preparation, sedation and analgesia/anesthesia of the patient in laparoscopy (20')  
Laparoscopic access and strategies. Prevention of complications (20')  
Equipment and Instrumentation (20') - Laparoscopic suturing and knot techniques (20')  
Exploratory laparoscopy - standing horse and horse in dorsal decubitus (20')

#### • 13.30 - 14.30 : theory, including demonstration with videos

Laparoscopic cryptochidectomy (15') - Laparoscopic ovarioectomy (20')  
Laparoscopic hernioplasty (20')

#### • 15.00 -18.30 : ex-vivo Lab, practical simulation exercises with anatomical specimens

Orientation and manipulation of instruments // Extracorporeal sliding knot techniques //  
Manipulation of the Ligasure, use of surgical staples and glue // Continuous suturing and  
sliding end-knot.

### Saturday

**Lab 1 In vivo = laparoscopic castration and hernioplasty.** Preparation; local anesthesia;  
introduction of trocars, surgical anatomy. Surgical procedures on retained abdominal and/  
or descended testis using Ligasure and knot techniques

**Lab 2 In vivo = laparoscopic ovarioectomy.** Preparation; local anesthesia; introduction of  
trocars, surgical anatomy. Surgical procedures on normal ovaries using Ligasure and knot  
techniques.

**Ex vivo lab** = complementary work on extracorporeal and intracorporeal knots, continuous  
suturing and sliding end-knot, use of surgical staples and glue

• **8.30-11.30 - Lab 1** : 3 horses would be used in 3 lab places - 4 participants per lab place.  
In each room, 2 participants would work alternatively on Lab 1 and ex vivo lab.

#### • 11.30-12.30 : debriefing following the labs

• **14.00-16.30 - Lab 2** : 3 horses would be used in 3 lab places - 4 participants per lab  
place. In each room, 2 participants would work alternatively on Lab 2 and ex vivo lab.

#### • 17.00-18.00 : debriefing following the labs - Discussion around clinical cases.

• **18.00 : workshop end** – shuttle to the airport or free evening and Sunday in Paris.

## PRACTICAL INFORMATIONS

1850 € (resident)  
2200 € (diplomate)  
2500 € (other)
