EUROPEAN EQUINE COELIOSCOPY WORKSHOP

BASIC IN VIVO COURSE

We are pleased to invite you to the second edition of the European Equine Coelioscopy Workshop ! The National Veterinary School of Alfort and the Grosbois Equine Clinic are willing to provide a highly practical workshop, with hands on in-vivo labs and presentation of clinical cases and surgical pitfalls.

ADVANTAGES

- ✓ The opportunity of in vivo labs - accredited through the ANSES/EnvA/UPEC ethic committee following ministerial authorization ;
- ✓ Benefit from the tips of experienced surgeons ;
- ✓ The National Veterinary School of Alfort, which is one of the oldest in the world, is located in the near suburbs of Paris, and easily accessible via public transportation.
- ✓ State of the art lectures given in this unique atmosphere will focus on general principles in laparoscopy, surgical techniques and tips, as well as common surgical procedures in equine practice.
- ✓ Our goal is to go from « how to » to « can do ». This course is principally dedicated to ECVS residents and diplomates, with some acceptance for surgeons with experience in surgery.
- ✓ Our long standing partners OPTOMED and COVIDIEN will provide you with state of the art equipment.

PROGRAM : JUNE 19&20, 2020 *(Drinks and snacks will be provided)*

Friday

• 10.00 - 12.00 : theory

Preparation, sedation and analgesia/anesthesia of the patient in laparoscopy (20')
Laparoscopic access and strategies. Prevention of complications (20')
Equipment and Instrumentation (20') - Laparoscopic suturing and knot techniques (20')
Exploratory laparoscopy - standing horse and horse in dorsal decubitus (20')

• 13.30 - 14.30 : theory, including demonstration with videos

Laparoscopic cryptorchidectomy (15') - Laparoscopic ovariectomy (20')
Laparoscopic hernioplasty (20')

• 15.00 - 18.30 : ex-vivo Lab, practical simulation exercises with anatomical specimens

Orientation and manipulation of instruments
Extracorporeal sliding knot techniques
Manipulation of the Ligasure, use of surgical staples and glue
Continuous suturing and sliding end-knot.

THANKS TO OUR PARTNERS

PROGRAM : JUNE 19&20, 2020

Saturday

Lab 1 In vivo = laparoscopic castration and hernioplasty. Preparation; local anesthesia; introduction of trocars, surgical anatomy. Surgical procedures on retained abdominal and/or descended testis using Ligasure and knot techniques

Lab 2 In vivo = laparoscopic ovariectomy. Preparation; local anesthesia; introduction of trocars, surgical anatomy. Surgical procedures on normal ovaries using Ligasure and knot techniques.

Ex vivo lab = complementary work on extracorporeal and intracorporeal knots, continuous suturing and sliding end-knot, use of surgical staples and glue

• **8.30-11.30 - Lab 1** : 3 horses would be used in 3 lab places - 4 participants per lab place. In each room, 2 participants would work alternatively on Lab 1 and Ex vivo lab.

• **11.30-12.30 : debriefing following the labs**

• **14.00-16.30 - Lab 2** : 3 horses would be used in 3 lab places - 4 participants per lab place. In each room, 2 participants would work alternatively on Lab 2 and Ex vivo lab.

• **17.00-18.00 : debriefing following the labs** - Discussion around clinical cases.

• **18.00 : workshop end** – shuttle to the airport or free evening and Sunday in Paris.

PRACTICAL INFORMATIONS

1850 € excl. taxes (resident)
2200 € excl. tax (diplome)
2500 € excl. tax (other)
